Frontend engineer and SDET with 3.5+ years at Yahoo Sports across web and mobile platforms. Shipped React features, modernized end-to-end test infrastructure, and integrated CI/CD pipelines that reduced production regressions. Experienced across the full development lifecycle from feature delivery to release quality.

WORK EXPERIENCE

Yahoo Sports | Los Angeles, CA & Remote

Software Test Engineer

Mar 2024 – Mar 2026

Led QA modernization and testing efforts across web and mobile platforms.

- Led migration of 50+ end-to-end automated tests off the deprecated Protractor framework to WebdriverIO within a Next.js stack, collaborating with frontend engineers to deliver ~35–40% faster execution and significantly improved test stability.
- Integrated automated test suites into CI/CD pipelines across cross-functional teams, reducing production regressions by ~30% and enabling faster, more confident release cycles.
- Identified, documented, and triaged 400+ defects including high-severity production-impacting bugs, partnering with developers to drive root-cause analysis and improve release quality across Yahoo Sports surfaces.
- Executed comprehensive manual and exploratory testing across Yahoo Sports web and mobile applications (iOS and Android), surfacing edge-case defects and ensuring consistent cross-platform user experiences ahead of release.

Software Engineer

May 2022 – Nov 2023

Built and maintained frontend features for Yahoo Sports product surfaces.

- Built and maintained development of 20+ reusable React/Flux components powering core Yahoo Sports features (from boxscores and standings to interactive data visualizations) serving millions of monthly users.
- Drove cross-functional delivery alongside product managers, designers, and backend engineers in an Agile environment, shipping 80+ frontend changes spanning new features, bug fixes, and technical improvements.
- Integrated SQL and GraphQL backends to deliver real-time, API-driven data across Yahoo Sports product surfaces, reducing client-side data fetch latency and improving load performance on high-traffic pages.
- Led the frontend migration of Yahoo Sports Australia to a redesigned platform, implementing and validating responsive components across desktop, tablet, and mobile web to support full market relaunch.
- Refactored legacy modules to improve performance and readability, cutting technical debt and reducing render times on key pages by ~20%.

AppFolio, Inc | Santa Barbara, CA

Customer Care Representative

Aug 2020 – Sep 2021

Delivered technical support and defect triage across AppFolio's property management platform.

- Owned reproduction and diagnosis of 100+ escalated defects in AppFolio Property Manager, isolating root causes and delivering clear reproduction steps that accelerated engineering fix turnaround.
- Drove resolution of 1,500+ technical cases across complex property management workflows at ~95% customer satisfaction rating, sharpening pattern recognition for recurring defects and edge cases.
- Delivered technical and accounting support to clients and onboarded new CCRs through hands-on product training, translating complex workflows into clear documentation and repeatable processes.
- Directed queue management and case triage alongside CCRs, prioritizing high-impact issues to accelerate resolution times.

SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React, React Native, Redux, HTML5, CSS3, SCSS

Testing & Automation: WebdriverIO, Playwright, Detox, SauceLabs

Backend: Node.js, Express.js, Ruby on Rails

Databases: SQL, MySQL, PostgreSQL, MongoDB, Firebase

DevOps/Tools: AWS, Git, Screwdriver CI/CD, Agile/Scr, JIRA

AI & Productivity: Claude Code, Copilot

EDUCATION & TRAINING

App Academy • Full Stack Web Development • 2021

University of California, Santa Barbara • B.A. Geography, GIS Emphasis • Minor: Art & Technology • 2020
